About the Workshop

Research is required not just for students and academics, but for all professionals. It is also important for budding and veteran writers, both offline and online. Finding an interesting topic to discuss and/or to write about should go beyond personal experience. Research helps people nurture their potential and achieve goals through various opportunities. These can be in the form of securing employment, scholarships, training grants, project funding, business collaboration, and budget travelling, among others.

Recognizing the inherent need for infusing research aptitude amongst all the workshop attempts to imbibe strong research foundation while beholding a practical approach. The workshop shall prove beneficial to all in particular to research scholars.
