Dear Engineering Educator,

Greetings !

Below is information and link for an IUCEE webinar this week on Friday.

I would also like to remind you about registering for ICTIEE 2016 in Pune Jan 8-12, 2016. Please visit the website for details: <http://www.ictiee.org/>

296 papers were submitted. Of these 152 were "Accepted for Oral Presentation" and 65 were "Accepted for Poster Presentation". 295 reviewers from around the world participated. We expect more than 40 international experts.

The authors whose papers have been accepted for oral presentation will be requested to present IUCEE webinars during the coming months, so that a larger audience can benefit.

Best wishes

Krishna Vedula

Executive Director, Indo US Collaborative for Engineering Education (IUCEE)

Past President, International Federation of Engineering Education Societies (IFEES)

Professor and Dean Emeritus, University of Massachusetts Lowell,

One University Ave, Lowell, MA 01854

**IUCEE Virtual Academy: "Pig Hadoop and Hive Hadoop"; Dr. E.Laxmi Lydia, VIIT  
Fri, Nov 20, 2015 3:30 PM - 4:30 PM IST**

Registration URL: <https://attendee.gotowebinar.com/register/5136102857930865665>

**Description**

Pig and Hive are the two key components of the Hadoop ecosystem. Pig hadoop and Hive hadoop have a similar goal- they are tools that ease the complexity of writing complex java MapReduce programs. However, when to use Pig Latin and when to use HiveQL is the question most of the have developers have. There is no simple way to compare both Pig and Hive without digging deep into both in greater detail as to how they help in processing large amounts of data. This webinar compares some of the prominent features of Pig Hadoop and Hive Hadoop to help users understand the similarities and difference between them.

**Speaker Details:**

E.Laxmi Lydia

Associate Professor, Computer Science Engineering

Vignan's Institute of Information Technology

Visakhapatnam
