

Model Question paper for online examination

S.Y.B.Sc.CS CS-I Computer Graphics

Q1. The most commonly used input device is

1. Mouse
2. ****Keyboard**
3. Scanner
4. Printer

Q2. Which keys allows user to enter frequently used operations in a single key stroke?

1. ****Function keys**
2. Cursor control keys
3. Trackball
4. Control keys

Q3. _____ are used to measure dial rotations.

1. Potentiometers
2. Volta meter
3. Parameter
4. ****Only a**

Q28. What is the name of the small integer which holds a bit for the result of every plane test?

1. setcode
2. ****outcode**
3. incode
4. bitcode

Q4. An outcode can have _____ bits for two-dimensional clipping and _____ bits for three-dimensional clipping.

1. ****4,6**
2. 6,8
3. 2,4
4. 1,3

Q5. We can generate the dashes in the various octants and the circle path with vertical path using

1. Circles
2. ****Circle symmetry**
3. Circle simmetry
4. Curve slope

Q6. A type of VR environment in which subjects are visually isolated from the real environment.

1. ****Immersive**
2. Semi immersive
3. Non immersive
4. Augmented

Q7. In this type of VR environment, the three-dimensional scene is considered as a part of the physical environment.

1. Immersive

2. Semi immersive
3. **Non immersive
4. Augmented

Q8. In this type of VR environment, the subjects can perform both in the real and virtual environment.

1. Immersive
2. **Semi immersive
3. Non immersive
4. Augmented

Note: Option marked with double asterisk () is correct option.**
